

ARYAN BISHT

 bisht.aryannn@gmail.com  linkedin.com/in/aryan-bisht-61573923a  github.com/Bisht28

EDUCATION

M.Sc Web Engineering

Technische Universität Chemnitz

04/2026 – Present

B.Tech Computer Science w/s Blockchain Technology

SRM Institute of Science and Technology

2021 – 2025

SKILLS

Proficient

Python | Microsoft Copilot Studio | Azure AI Services |
OpenAI | RESTful API Development (Node.js/Express) |
React.js | SQL

PUBLICATIONS

Air Quality Index Forecasting via Bi-LSTM

IEEE – International Conference on Smart & Sustainable
Technology (INCSST), 2025

- Proposed and implemented a hybrid Bi-LSTM model for AQI forecasting, reducing RMSE by 15% compared to traditional ML models
- DOI: 10.1109/INCSST64791.2025.11210266

PROJECTS

Dairy-Gradaation-System

- Constructed a ML-based system to grade milk quality using pH, fat content, and density features
- Trained and deployed models using Python and TensorFlow with Flask-based REST APIs for real-time inference
- Formulated ML-based grading system achieving 91% classification accuracy

Shopping-Cart

- Created a scalable shopping cart system using the MERN stack
- Deployed customizable product features and dynamic pricing logic
- Integrated a MERN-based e-commerce platform and optimized MongoDB queries, reducing data retrieval time by 25%

CERTIFICATES

- Oracle Cloud Infrastructure 2024 Certified Foundations
- AWS Academy Machine Learning Foundations
- appliedAI Institute for Europe gGmbH AI Essentials

PROFESSIONAL EXPERIENCE

AI Engineer (Full-Time)

Nihilent

06/2025 – 03/2026

- Led enterprise-scale Microsoft Copilot Studio Agents deployment for a large enterprise client, supporting 1000+ users and automating workflows across Microsoft 365 environments
- Architected multi-step LLM orchestration pipelines with contextual reasoning and task chaining, reducing manual task execution time by 35%
- Engineered secure Copilot integrations with Microsoft Dataverse to automate enterprise business processes across cross-functional teams
- Built and deployed RESTful APIs and backend services handling , enabling scalable production-grade Copilot solutions

Software Developer Trainee

Nihilent

10/2024 – 06/2025

- Delivered Azure-based automation workflows reducing manual processing time by 20%
- Developed and deployed custom applications using Microsoft Power Apps, improving operational efficiency
- Integrated Power Platform tools with Azure services to streamline workflows and enable data-driven decision-making

Software Developer Intern

Primafelicitas

08/2024 – 10/2024

- Engineered an AI-driven automation system, reducing response time by 50%
- Built and optimized RESTful APIs using Node.js and Express, improving backend performance by 25%
- Managed and maintained MongoDB databases using Mongoose for scalable data handling

AI Engineer Trainee

NHMAS SOLUTIONS PVT LTD

04/2023 – 09/2023

- Enhanced machine learning models through feature engineering and preprocessing
- Improved model accuracy by 12% through feature engineering and tuning
- Supported production deployment of AI solutions across workflows
